

CP 070

2K slow thinner

CP 070 Thinner is purposefully designed for 2K products, as well as clearcoat products and paints. Offering flexibility in viscosity control based on operating temperature and repair range, this thinner is especially effective at temperatures exceeding 25°C.

For ease of use, **CP 070** is conveniently available in 1-Litre tins, providing a practical solution for adjusting viscosity and ensuring optimal performance in various painting applications.

PACKAGING	
Volume	Collective packaging
1 l	6 pcs.

EFFICIENT

SLOW THINNER

LONG SHELF LIFE

FOR 2K PRODUCTS

TEMPERATURE RANGE

25-35°C

APPLICATION

- clearcoats
- **ACRYL** and **LV CRYL**
- acrylic primers
- epoxy primers

POT LIFE

Ready-to-use product

MINIMUM SHELF LIFE

24 months in originally sealed packaging

EVAPORATION TIME AFTER APPLICATION

It increases evaporation time for 2K products
